Please enter claim 19 as rewritten below:

19. (Thrice Amended) A method for identifying a bioactivity or biomolecule of interest using high throughput screening of DNA comprising:

a) contacting a bioactive substrate that is fluorescent in the presence of the bioactivity or biomolecule of interest with a library containing a plurality of clones containing naturally occurring DNA from at least one organism;

Atty. Docket No.: DIVER1280

b) screening the library with a fluorescent analyzer that detects bioactive fluorescence, and

c) identifying clones detected as positive for bioactive fluorescence, wherein fluorescence is indicative of naturally occurring DNA that encodes a bioactivity or biomolecule of interest.
